MODULAR
Stock: Wirecut Full Range
2 PIECES = 1 CORNER

Applications

Stock Shapes—Stock shapes are available at the time of order and are a great design element to add to our traditional brick.

Non-Stock Shapes—There are several shapes including A-45, WT-4 and New Concept Arches that are regularly produced but because of infrequent demand these are now made to order. The normal lead time is 6 to 8 weeks from the time the order is finalized. See the Non-Stock list for pricing.

Custom Shapes—These shapes are created from imagination or classic forms. We encourage creativity but require detailed drawings approved by the architect or contractor before proceeding with production. Custom orders are priced on an individual basis with general lead times of 8 to 12 weeks.
